

EXTERNAL SUPPORT RESOURCE

TITLE: ROLLER PUMP SPEED TABLE

NAME: ESR-026 | ISSUE DATE: 4 FEB 2019 | REVISION: 1

PURPOSE:

This support resource is put in place to show the operational speeds and flow for each roller pump that is built and sold by Delavan Ag Pumps.

TOOLS REQUIRED:

Table 1: Approximate Flow Rates Based on RPM Speeds of Roller Pumps

- Note that the numbers in table 1 are approximates. Pumps may be ran at different RPM's that specified in table 1, but doing so will change performance of pump.
 - Use caution when using slower than specified RPM's that pump does not run dry as pump failure will occur.
 - It is not recommended to run pumps at higher than specified speeds and doing so may result in damage to pump.
- Flow rates do not always decrease or increase linearly with RPM decreases.
- If the flow specification you are looking for is not specified, please contact Delavan representative to be assisted in obtaining desired information.
